

BROWSER SECURITY

• BROWSER ISOLATION

• ZERO-HOUR PHISHING

• CDR BUILT IN

• AI-AGENT GOVERNANCE

Cloud browser security that isolates every web session - eliminating phishing and malware for human users and AI agents alike.

ABOUT MENLO SECURITY

Menlo Security is a browser security platform that isolates every web session in remote, air-gapped containers, so phishing pages, ransomware and zero-day exploits never execute on the endpoint. With Votiro Content Disarm and Reconstruction (CDR) built in, threats are stripped from downloaded files surgically while full functionality is preserved - users never trade productivity for protection.

The platform is designed for both human users and AI agents: as autonomous agents begin operating inside browsers, Menlo extends the same isolation and governance model to machine-driven sessions - a capability legacy proxies and endpoint tools cannot match. It is trusted at the highest end of the market: the company states that eight of the ten largest banks in the world use Menlo.

Most attacks start in the browser, and evasive threats bypass secure web gateways and email filters. Isolation removes the blind spot: active web content never reaches the device.

THE PROBLEM

Almost every attack starts in the browser - and now AI agents browse too. Legacy proxies inspect traffic; they do not stop what renders.

HOW MENLO SECURITY SOLVES IT

Menlo Security isolates every session in the cloud, so web threats never reach the endpoint - human or machine.

CAPABILITIES

Remote browser isolation

Every session renders in an air-gapped cloud container. Active web content never reaches the endpoint.

Zero-hour phishing protection

Stops highly evasive threats and credential-phishing pages that bypass secure web gateways and email filters.

File CDR built in

Votiro Content Disarm and Reconstruction strips threats from downloads while keeping files fully usable.

AI-agent session governance

Applies isolation and policy to autonomous, machine-driven browser sessions - not just human ones.

QUICK FACTS

WEBSITE: menlosecurity.com CATEGORY: Browser isolation / secure enterprise browsing

TRUSTED BY: 8 of the 10 largest banks worldwide (company-stated)

BUILT IN: Votiro Content Disarm & Reconstruction (CDR)
